PROFESSIONAL SUMMARY

Full Stack Engineer with 6+ years of professional experience building scalable web applications using **Python/Django** and modern frontend technologies. Proven ability to deliver end-to-end solutions, including **RESTful API design**, database optimization, and responsive UI implementation. Strong team collaborator and self-motivated learner with a track record of on-time project delivery.

WORK EXPERIENCES

Python Backend Developer | Full-time

Feb 2024 - Present

Turing (Remote Projects)

Remote • Remote

- Develop and maintain scalable web applications using **Python, Django, and FastAPI**, building and improving **REST APIs**, backend services, and server-side logic while supporting smooth **frontend and backend integration**.
- Manage **database systems**, authentication, authorization flows, **performance optimization**, and deployment workflows using **Docker, Redis, AWS, and OAuth 2.0** to support secure, responsive applications.
- Contribute to **AI model evaluation, human review, response quality checks**, action labeling, **prompt analysis**, and prompt safety testing to improve **model accuracy, reliability, and safety**.

Technologies / Skills Used : Python, Django, FastAPI, Docker, Redis, AWS, REST APIs, OAuth 2.0

Backend Engineer (Python) | Freelance

Jan 2023 - Jan 2024

Freelance

Remote • Remote

- Worked remotely with international clients in an **Agile** environment to design, develop, test, and maintain **REST APIs**, server-side applications, **business logic**, **authentication**, and **database models** using **Python, Django, DRF, MySQL, and PostgreSQL**.
- Collaborated with **front-end developers** using **React.js, HTML5, CSS3, JavaScript, Bootstrap**, and **Tailwind CSS** to build scalable, responsive, high-performance full stack web applications, while optimizing **database queries, API performance**, and **backend architecture** for better scalability, reliability, and security.
- Participated in the complete **Software Development Life Cycle (SDLC)**, including requirements analysis, feature development, debugging, testing, code reviews, deployment, maintenance, and production support, using **Git, GitHub, Docker**, and **Jira**.

Technologies / Skills Used : React, Python, Django, Django REST Framework (DRF), MySQL, PostgreSQL

Laravel PHP Developer | Part time

Jun 2022 - Dec 2022

PetSaal Technologies

- Built and maintained **dynamic, secure**, and scalable **web applications** using **PHP and Laravel**, developing **RESTful APIs**, authentication systems, admin dashboards, and business features for real-world client needs.
- Worked with **MySQL database design, backend optimization, MVC structure**, and **frontend integration** to deliver smooth, responsive user experiences using **Bootstrap 5, Tailwind CSS, HTML5**, and **Chart.js**.
- Handled **debugging, feature updates, deployment**, and **custom changes** based on project and client requirements, following clean code and full-stack workflow practices with **Git**.

Technologies / Skills Used : PHP 8.x, Laravel, MySQL, Bootstrap 5, Tailwind CSS, HTML5, Chart.js, Git

Full Stack Developer | Freelance

Mar 2021 - Jun 2022

Freelance

Remote • Remote

- Worked with international clients on **Python and Django-based web applications**, backend systems, and full-stack solutions, developing and maintaining **APIs, server-side logic**, with a strong focus on **performance** and **code quality**.
- Collaborated with **frontend developers** and remote teams to build high-performance, production-ready web apps, improving application speed, database handling, and deployment workflows.
- Used **Python, Django, Flask, React, PostgreSQL**, and **Git** across different freelance projects, with continuous testing and debugging to support smooth delivery.

Technologies / Skills Used : Python, Django, Flask, React, REST APIs, PostgreSQL, Git

Python Developer | Part time

Jan 2020 - Apr 2021

Oasis Infobyte

- Developed multiple **Python applications, automation tools**, and **software projects** with a focus on **logic building, problem solving**, and **real-time functionality**, including **chat applications** built with **socket programming**, input validation, and secure user-side checks.
- Designed **voice assistant features** using **speech recognition** and automation logic to execute tasks through voice commands.
- Gained hands-on experience in **backend development, debugging, API concepts**, and **software optimization**, strengthening coding skills and development workflow through practical project work.

Technologies / Skills Used : Python, Java, MySQL, Git

ACHIEVEMENTS

- Awarded **Best Performance Award** by **Turing (Remote Projects)** (May 15, 2024; November 3, 2025).

PROJECTS

E-Learning Platform

Jan 2026

Developed a cross-platform LMS distinguishing government vs. private degrees, enabling offline lecture downloads via Django and REST APIs.

Technologies / Tools Used : Django, Django REST Framework (DRF), REST APIs, SQLite

Amazon AI Model Evaluations

Jan 2026

Evaluated **large language models (LLMs)** on code prompts, measuring **accuracy, instruction-following**, and efficiency through live execution and structured logging.

Technologies / Tools Used : Python, Docker, Automated Test Scripting, LLM Evaluation

E-Commerce Web App

Jun 2023

Responsive Python/Django storefront with **MySQL & modern CSS**. Features catalog search/filter, full cart workflow, and **REST APIs** for products, cart, & orders

Technologies / Tools Used : Python, Django, MySQL, Bootstrap, Tailwind CSS, REST APIs

CRM & Personal Blogs

Oct 2023

Django CRM with authenticated contact management, **Bootstrap UI**, **SQLite/MySQL** backend, registration/login, flash messages, and full CRUD via clean views, forms, and templates.

Technologies / Tools Used : Django, Bootstrap, SQLite, MySQL, Django Templates

More projects can be viewed on my portfolio: alamzaib.dev.netvixia.online

SKILLS

Databases :	PostgreSQL, MySQL, SQLite, Redis, Django Model Manager
Frameworks & Libraries :	Django, Django REST Framework (DRF), Laravel, FastAPI, React, Vue.js, Bootstrap 5, Tailwind CSS, Django Templates
Programming Languages :	Python, PHP, JavaScript, Java, HTML5, CSS3
Soft Skills :	Communication, Teamwork, Problem Solving, Critical Thinking, Adaptability
Tools & Platforms :	Docker, AWS, DigitalOcean, Git, GitHub, Celery, Jira, REST APIs, Chart.js, OAuth 2.0, JWT

EDUCATIONS

Garrison University Lahore, Pakistan	2020 - 2024
Bachelor of Science in Computer Science	
• Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Web Development, Programming Fundamentals.	

CERTIFICATIONS

Computer Software Certificate
